

# Mr Gorbachev, Tear Down This Wall!

The Champagne of the North! This Berliner Weiss style beer is light and dry with a tart finish. Highly refreshing and low in alcohol content, this ale makes a great thirst quencher!

# **RECIPE DETAILS**

| 3.5 lbs. | White Wheat Malt |
|----------|------------------|
| 3.0 lb.  | Pilsner Malt     |
| 0.75 lb. | Acid Malt        |

#### 90 Minute Boil Be sure to account for extra volume for the extended boil time

| Mt. Hood hops, added 60 min from the end of the boil<br>Irish moss ( <i>optional</i> ), added 20 min from the end of the boil |
|---|
| <br>BOIL SCHEDULI   |

Included is a lactobacillus strain, which should be pitched with the primary yeast strain.

YEAST SUGGESTIONS: Wyeast #1007 German Ale, Wyeast #1056 American Ale, or Safale-05 dry yeast

#### **BEER SPECS**

#### **Original Gravity:**

1.032 —1.034 @ 65% efficiency 1.034 —1.036 @ 70% efficiency 1.037 —1.039 @ 75% efficiency Final Gravity: 1.003—1.006 IBU: 3-5 ABV%: 3.4% - 4.7% Yield: 5 Gallons

## NOT INCLUDED IN KIT

Irish Moss (for clarity, optional)

Yeast

Bottle Caps (53 caps needed)

Priming Sugar (5oz or 3/4 cup)

## **MASH & FERMENTATION**

#### Suggested Mash Temperature:

A low mash temperature is recommended to create a fermentable wort that will lead to a very easy-drinking beer. We suggest a mash temperature of 148° - 150°F.. You may choose to extend the mash time for full conversion.

#### Fermentation Schedule:

Pitch both the primary strain and the lactobacillus at pitching time. We recommend a primary fermentation of two weeks to four weeks at 64° - 72° F. A secondary fermentation of one to two weeks may be used to improve clarity and reduce sedimentation, if desired.
